EDUCATION

Southern Virginia University : GPA 3.8   Aug 2015 - Dec 2021
Bachelor of Science, Computer Science
- NCAA USA South Academic All American / Captain of SVU Football team

DevMountain   Jan 2022 - May 2022
Full Stack Web Developer Certificate

WORK EXPERIENCE / PROJECTS

Web and Systems Administrator   July 2022 - Present
Brigham Young University   Provo, UT

- Managed multiple websites for the Religious Education department, including an e-commerce site.

- Built a checkout system used by the whole department that manages assets.

- Designed, developed and implemented new web and non-web based utilities and applications to manage operations and web content that increased the productivity of our design and content teams. The impact of these designs, developments, and implementations drove passionate work.

- Provided ongoing preventative maintenance and ensured that all server operating systems, software, and databases are regularly updated with functionality and latest security patches.

- Hired, managed and trained a full stack web/dev team and held regular meetings and communication with employees. I was able to increase team unity and we grew a lot together.

Full Stack Software Engineer   Aug 2021 - Dec 2021
RedList, Software Consulting   Pleasant Grove, UT

- Lead the efforts on a new initiative regarding speech recognition. The mobile app needed to have a certain level of accessibility for all users to be able to work quickly and efficiently using our tool.

- Provided reports and updates on the effectiveness and overall accuracy of the voice module.

- Learned quickly in an environment with new technologies and became proficient in: C# programming language, React Native development, iOS/Android native libraries

Software Engineer   Jan 2021-Aug 2021
SVU   Buena Vista, VA

- Leveraged web technologies to simplify the workload of the school's registrar.

- Wrote an API bridge that communicated between multiple data sources in order to aggregate information into a single place for the administrative office to use.

Freelance Developer   Jan 2022 - Present

- Successfully designed, developed, and deployed a cutting-edge finance application for both Android and iOS platforms. Leveraging React Native, Expo, and Firebase Technologies, I transformed financial management into a seamless and user-friendly experience.
